The most Interesting Nursery in California

EVANS & REEVES NURSERIES

"It's Different"

FOREWORD

EVANS & REEVES NURSERIES hold an enviable reputation throughout the country as growers of choice plants. For a number of years one of the members of this firm as a private collector spent time, effort and money introducing new and desirable plants from other lands into California. The present firm is continuing this policy and practice to the end that our gardens may be thereby enriched and beautified. We are gratified to see so many plants of proved merit which we originally introduced, now grown and offered for sale by other firms and dealers. But whether new, rare, or just the old garden favorites; it has been our policy to grow only the **best** and to grow it **well**. We are jealous of this reputation, and as our slogan indicates, you will find that plants bearing the EVANS & REEVES label are truly "**different.**"

The display gardens maintained in connection with our nurseries, contain thousands of plants collected from all parts of the world. You are urged to visit these gardens and enjoy this colorful display. Seeing mature specimens growing in the ground under natural conditions, makes the selection of nursery stock for your own garden much easier.

The nurseries and display gardens are conveniently located in beautiful Brentwood in West Los Angeles and reached by a pleasant drive through one of the finest residential districts of Southern California. Out of consideration for many business people, the nurseries are kept open on Sundays throughout the year.

TERMS AND CONDITIONS

PRICES: All prices are f.o.b. West Los Angeles (except where noted below) and are subject to change without notice. On California sales, add state sales tax of 3%.

DELIVERIES: Nursery stock is delivered free of charge to points within a ten mile radius of our nurseries. To outlying districts, orders will be delivered free of charge in combined truck load lots, or at the convenience of EVANS & REEVES NURSERIES. Deliveries to distant points will be charged for at below cost.

SHIPMENTS: Plants will be shipped by freight or express to points outside our delivery zones, on request. All transportation charges will be collect, unless other arrangements are made. A charge of 10% of the amount of the order, will be made for packing and crating, with a minimum of 50c on any order. Packing is done as lightly as possible, consistent with safety.

NON WARRANTY: We exercise the greatest care to have all stock true to name, nevertheless, all merchandise is sold with the understanding that should it prove to be untrue to name, EVANS & REEVES NURSERIES shall be liable only for the sum paid for such stock untrue to name, and shall not be liable for any greater amount.

PLANTING GUIDE

Plants in this catalogue are listed and described in alphabetical order. For the convenience of our clients, we have suggested certain uses for plants in this "planting guide" which will facilitate your selection of plants for a particular purpose.

LOW SHRUBS (Normally 2 ft. to 4 ft.)

**Prefer partial shade*

<i>*Abutilons (see list)</i>	Helianthemums
Asters (shrub type)	<i>*Hydrangeas (French)</i>
<i>*Abelia floribunda</i>	Hypericum
<i>*Brunfelsia</i>	Heliotrope
Bellerperone	Hibiscus chrysantha
<i>*Bouvardias</i>	Lantana
Cerastotigma	<i>*Libonia</i>
<i>*Calceolarias (shrub types)</i>	Marguerites
Cistus	Myrtus
Convolvulus	Ochna
Correas	Pentas
Cuphea	Pelargoniums
Diosma	<i>*Ruellia</i>
Echium	<i>*Reinwardtia</i>
Euryops	Sutera
<i>*Eranthemum</i>	Thevetia
<i>*Fuchsias</i>	Turraea
Gossypium	<i>*Ternstroemia</i>
Grevilleas	Westringia

SHRUBS SUITABLE FOR HEDGES

Escallonias	Prunus
Eugenias	Pyracantha
Hibiscus	Punica (pomegranate)
Oleander	Turraea
Myrtus	Westringia
Pittosporum	Bowkeria

LARGE SHRUBS (Normally 6 ft. to 12 ft.)

**Prefer partial shade*

<i>*Abutilons (see list)</i>	<i>*Fuchsias (see list)</i>
Abelias	Grewia
Alstonia	Grevillea
Arbutus	Genistas
Barleria	Hibiscus
Baeckia	Holmskioldtia
Bowkeria	Inga
<i>*Brunfelsia</i>	Leptospermums
Bauhinias	Leucophyllum
Cassias	<i>*Luculia</i>
<i>*Camellias</i>	<i>*Mackaya</i>
<i>*Cantuas</i>	Murraya
Callistemons	Nerium (Oleander)
Cotoneasters	<i>*Pleroma</i>
Chamaelaucium	Polygala
Crotalarias	Prunus
Cydonia	Pyracanthas
Datura	Rapheolepsis
Dombeyas	<i>*Rondeletia</i>
Ericas	Sophora
Escallonias	Tecomas
Erythrinas (Corals)	Vitex
Eucalyptus (see list)	Viburnum
Eugenia jambos	

SHRUBS SUITABLE TO ESPALIER

Abutilons (see list)	Holmskioldtia
Clianthus	Pleroma scandens
Crotalaria	Pyracantha
Grewia	Bauhinia Tomentosa
Hibiscus (see list)	Bauhinia candicans

PLANTS FOR SHADY PLACES

Azalias	Coleus
Abutilons	Epidendrum (ground orchid)
Aristea	Ferns
Begonias	Fuchsias
Bouvardias	Hydrangeas
Billbergias	Impatiens
Browallia	Pentas
Camellias	Primulas
Calceolaria rugosa	Ruellia
Clivia	

FRAGRANT FLOWERS

(*Vines)

Acacias	*Jasminum
*Bauhinia corymbosa	Luculia
*Beaumontia	Magnolia
Bouvardias	Mahernia
Brunfelsia	*Mandevillea
Carissa	Murraya
Dianthus	*Phaseolus
*Distictus	Philadelphus
Gardenias	*Rynchospermum
Hedychium	*Senecio
	*Stephanotis

PLANTS FOR DESERT GARDENS

(Sunny, dry, usually sterile soils)

Cistus	Grevillea
Chamaelaucium	Leptospermum
Arctotis	Parkinsonia
Acacias	Leucophyllum
Eucalyptus	Fremontia
Euryops	Romneya
Echium	Penstemon cordifolios
Gossypium	Photinia (Holly)
Helianthemum	Ceanothus

SELECT PERENNIALS (for borders)

Asters (dwarf perennials)	Felicia rotundifolia
Arctotis (African daisies)	Pelargoniums (species & hybrids)
Calceolaria rugosa hybrids	Reinwardtia tetragyna
Chrysanthemum (see list)	Romneya (Matiliha poppy)
Campanulas	Sutera grandiflora
Cuphea Melvillei	Trachelium
Dianthus (select hybrids)	Dimorphothecas
Gazania pavonia hybrids	Gerberas (Transvall Daisies)
Heuchera (coral bells)	

FLOWERS FOR CUTTING

(*Shrubs)

Aster fricarti	*Euryops
Bletilla	Felicia
*Callistemon	Gazania
*Cantua	Hemerocallis
Chrysanthemum	Hedychium
*Chamaelaucium	*Holmskioldtia
*Crotalaria	*Philadelphus
Dianthus	Senecio
Dimorphotheca	Stephanotis
Dierama	Trachelium
Epidendrum	*Vitex
*Eucalyptus	

SHADE TREES (Shade primary purpose)

Acacias	Jacaranda
Agonis	Koelreuteria
Bauhinia candicans	Magnolia
(Butterfly tree)	Pittosporum (see list)
Calodendron (Cape chestnut)	Schinus (Pepper tree)
Coulteria	Tipuana

SPECIMEN TREES (Flowering or Ornamental)

Acacias	Jacaranda
Agonis	Leucadendron (Silver tree)
Bauhinias (Orchid trees)	Magnolia
Callistemon	Metrosideros
Castanospermum	Parkinsonia
Erythrinias (Coral trees)	Pittosporums (see list)
Eugenias (see list)	Schinus (Brazilian Pepper)
Eucalyptus (see list)	Sterculia (Flame tree)
Harpullia	Tricuspidaria (Flowering
Hibiscus arnottianus	Oak)
Hymenosporum	

WINDBREAKS & SCREENS

Acacias	Escallonias
Callistemon floribunda	Metrosideros
Eucalyptus (see list)	Pittosporums (see list)
Eugenias (see list)	Prunus

IRIS-LIKE or SWORD LEAFED PLANTS

Aristeas	Hemerocallis (day lilies)
Dieramas (wind bells)	Hedychium (ginger lily)
Moraeas (everblooming iris)	Agapanthus
Strelitzia (Bird of Paradise)	Iris stylosa
Alpinia nutans	

HEAVY VINES (High climbing, normally of heavy foliage)

Bauhinia corymboas	Rosa gigantea
Bignonias (see list)	Tecoma australis rosea
Beaumontia (Easter Lily	Thunbergia grandiflora
Vine)	Solandras (see list)
Bougainvilleas	Vitis capensis
Lonicera Hildebrandi	
(Giant Honeysuckle)	

MEDIUM VINES (Medium height, lighter foliage)

***Deciduous**

†Partial Shade

*Antigonon (Rosa de montana)	*Mandevillea (Chilean Jessamine)
*Clematis	†Oxera (Royal climber)
Bignonia (see list)	Passiflora
†Bomarea	*Phaseolus (Snail flower)
Distictus	Philadelphus
†Gelsemium (Carolina Jessamine)	†Rhyncospermum
†Hibbertia	Senecio (Mexican daisy vine)
Hardenbergias (see list)	Solanums
†Hoya (wax vine)	†Stephanotis
Jasminums (see list)	Stigmaphyllon (orchid vine)
Jacquemontia	Tecomas (see list)
	Thunbergia Gibsoni (orange creeper)

GROUND COVERS (Prostrate or trailing plants)

***Prefers partial shade**

*Campanula isophylla	Gazania hybrids
*Ajuga	Lopezia
Convolvulus mauretanica	Lotus bertholeti
Grevillea obtusifolia	Felecia
Helianthemum	Mahernia
*Helxine soleirolii (baby tears)	*Nepeta hederacea
	Thunbergia gibsoni

Evans & Reeves Superior Plants

They are "Different"

Many of the plants listed here are rare, most of them are new, all of them have merit. We have tested them thoroughly and highly recommend them; you may grow them with confidence. Insofar as possible, cultural directions are given. **Unless otherwise stated, prices quoted are for plants in one gallon and five gallon containers respectively.** Larger specimens in tubs and boxes are individually priced according to size and variety.

ABELIA grandiflora (China)

Medium sized evergreen shrub, arching habit, multitude of small pinkish white flowers in summer and fall. Full sun or shade, any soil. 40c and \$1.50.

ABELIA Schumannii (China)

Similar to above, flowers being a beautiful rosy pink. New. 60c and \$1.75.

ABELIA floribunda (Mexico)

Dwarf evergreen shrub, small neat foliage, racemes of rosy-carmine flowers not unlike those of a Cantua. Will stand a great deal of cold. Part shade, good soil, likes moisture. 75c.

ABUTILONS (Flowering Maples)

Showy shrubs with drooping bell-shaped flowers resembling Chinese lanterns. They like a rich soil, moisture and do better in partial shade. They are prolific bloomers during most of the year.

ABUTILON coccineum

Medium sized plant with large handsome foliage. Large beautiful flowers of deep red. 50c and \$1.50.

ABUTILON megapotamicum

Tall, slender shrub with neat foliage and a profusion of smaller yellow and brown flowers. Ideal to espalier. 50c and \$1.75.

ABUTILON speciosum

A rare dwarf and compact Abutilon with large, showy, bright copper-orange flowers. This is one of our favorites. 60c and \$1.50 to \$2.00.

ABUTILON Thompsoni

Larger growing shrub with slender branches and many medium size orange-brown flowers. 50c and \$1.50.

ABUTILON variegata

Similar to the above with handsome marbled foliage of green and gold. Yellow flowers. 50c and \$1.50.

ABUTILON hybrids

Medium sized plants with flowers of white, cream, pink, yellow, red and purple. Gallon, 50c; 5 gallons, \$1.50.

ACACIA Baileyana (Australia)

In our opinion the most handsome of all the acacias with beautiful silvery blue-grey foliage. Completely covered in late winter with great sprays of lemon-yellow flowers. A beautiful garden tree and hardy. Full sun, any soil, not much moisture. 50c and \$1.50. (All Acacias same price.)

A. cultriformis (Knife Acacia)

Tall spreading shrub to 15 feet. Curious triangular leaves, flowers late winter or early spring. Good hedge.

A. dealbata (The Silver Wattle)

Fast-growing tree to 40 feet; bluish-green leaves and bright yellow flowers in early spring.

A. floribunda

Round-headed tree to 25 feet, fast-growing; flowers intermittently throughout the year.

A. latifolia

From 15 to 25 feet; good background tree for medium bushy effects; with pruning makes dense mass of foliage; adaptable for seacoast.

A. verticillata (Whorl-leaved Acacia)

Spreading shrub to 20 feet; used for hedges or as specimen plant. Needle-like leaves give the plant the appearance of a conifer.

ALPINIA nutans (East Indies) "Shell Flower"

Beautiful tropical plants with canna-like foliage 6 to 8 feet high, and sprays of orchid-like pink and yellow flowers, blooming almost continuously. One of the most handsome and unusual of all plants for pool effects. Scarce. Clumps, \$1.00 and \$2.00.

ALSTONIA scholaris (India)

Medium size evergreen shrub, bright green foliage, umbels of white tubular-shaped flowers with twisted petals. A rare and beautiful plant. Full sun. Good soil and moisture. 75c and \$1.75.

ANTIGONON leptopus (Mexico) "Rosa de montana"

Medium growing deciduous vine, blooming in summer and fall. Racemes of deep rose flowers of a papery texture. An unusually beautiful thing either on a roof, on a fence or climbing up through a tree. This is one of the favorites of Old Mexico. Full sun. 50c and \$1.50.

ARBUTUS unedo (Ireland) "Strawberry Tree"

Large evergreen shrub with small drooping creamy-white bells, followed by large red fruits exactly like ripe strawberries. Very ornamental. Full sun. 50c and \$1.50.

ARISTEA ecklonis (South Africa)

Iris-leaved plant, evergreen, growing to about 2 feet. Deep blue flowers in clusters in summer. Sun or partial shade. Likes moisture. 50c and \$1.50.

ASTER fricarti

A sensational new, large-flowered perennial aster, with beautiful clear lavender-blue flowers, with silver sheen. In bloom from late spring till midwinter. Grows to about 2 feet. Full sun, any soil. 4" pots, 40c.

ASTER fruticosus (South Africa)

A true evergreen shrub to about 3 feet. In early spring this bush is literally smothered with small flowers of a wonderful rosy-mauve. In our opinion, this is one of the finest small shrubs introduced in many years. Will stand cold. Full sun, any soil. 50c and \$1.50.

BAECKIA virgata (Australia)

Medium size evergreen shrub, graceful pendulous habit, small foliage. Branches covered with small fragrant white flowers in summer. New. Full sun, any soil. 60c and \$1.75.

BAUHINIA candicans (South America) "Butterfly Tree"

Semi-deciduous tree, with spreading habit. Large pure white flowers in summer, shaped exactly like large butterflies. A beautiful and scarce tree. Any soil. 60c and \$1.75.

BAUHINIA corymbosa (China) "Butterfly Vine"

A strong-growing evergreen climber, with beautiful foliage, light green and bronze. Large panicles of pink and white flowers in spring and summer, with an intoxicating fragrance. This is new and very scarce and we consider it one of the finest vines we grow. Full sun, any soil. \$1.50 and \$5.00.

BAUHINIA galpini (South Africa)

Can be grown either as a shrub or as a climber. Orange nasturtion flowers in summer and fall. Very beautiful and rare. Full sun, any soil. \$1.00 up.

BAUHINIA purpurea (American Tropics) "Orchid Tree"

Very attractive large shrub or small tree, particularly fine in hot situations. Flowers are orchid-colored and orchid-shaped, hence its name. Full sun, any soil. 50c and \$1.50.

BAUHINIA tomentosa (India) "Sweetheart Bauhinia"

Medium size evergreen shrub, with interesting foliage. Drooping yellow bell-shaped flowers with a perfect dark brown heart in the upper petal. Prolific summer bloomer. Worth a place in any garden. Full sun, any soil. 60c and \$1.75.

BEAUMONTIA grandiflora (Nepal, India) "Easter Lily Vine"

Very vigorous evergreen climber, beautiful large, lustrous foliage. Covered in winter, spring and summer with clusters of large trumpet-shaped flowers exactly like Easter Lilies. You will acclaim this vine as one of the most beautiful and noble climbers you have ever seen. Will do well in any situation where Bougainvilleas grow, or not subject to heavy frosts. Highly recommended. Full sun, good soil, moisture. \$1.50 and \$3.50 to \$5.00.

★ BEGONIAS

EVANS & REEVES NURSERIES have one of the finest collections in the country of these shade-loving plants. The varieties we grow include all types, bedding, fibrous, tree types, tuberous, etc. They must be seen to be appreciated and all lovers of these beautiful plants are urged to visit our display gardens, famed for its fine Begonia collection. Following is a partial list of our collection. PRICES (except where noted): 3" pots, 35c; 4" pots, 50c; 6" pots, \$1.00 and \$1.50. Larger specimens, \$2.00 to \$10.00.

FIBROUS BEGONIAS (Tree Form)

(Big growers, up to ten feet, huge clusters of bloom)

Coralline Lucerne. Largest of all, immense clusters of deep pink flowers.

President Carnot. Brilliant red.

Helen. White. 75c.

De Lesseps. Pink-white.

Rossi. Light pink.

Geneva. Spotted leaves, pink flowers.

Argentea guttata. Heavily spotted leaves, greenish-white flowers.

Maybelle E. Dark silver-spotted leaves, flowers red, white centers. 75c.

Helen King. Dark metallic leaves, pink blossoms. 75c.

Rubras (Angel Wing). In colors of red, pink and salmon.

Rubra odorata. Fragrant deep rose. 75c.

Alba perfecta. Dainty white.

Shasta. Large white. 75c.

Martha. Medium grower, deep red. 75c.

Mary. Very bushy, red flowers. 75c.

OTHER TALL TYPES

Multiflora rosea. Small flowers of delicate pink, small foliage.

Fuschioides. Similar to above, flowers scarlet.

Wallow. One of the finest of all, beautiful dark foliage, white flowers. 75c.

Scripps Seedling. Handsome dark foliage, a really beautiful plant. 75c.

MEDIUM GROWTH

Preusen. Small foliage, profusion of pink blossoms. Fine pot plant.

Sachsen. Similar, with bronze foliage and red blooms.

Marguerite. Delicate pink flowers, bushy grower, metallic green foliage.

Impr. Digswelliana. Bushy, with small foliage and a profusion of tinted pink and white blossoms. One of the prettiest of all.

Robusta. Small foliage, blooms pink to red. Stands sun.

Odorata alba. Spreading bush with large clusters of fragrant white flowers that are very showy. A fine variety.

LOW GROWING

McBethii. Semi-tuberous, bushy habit, fern-like foliage, white flowers.

Dreigi. Like above with darker foliage.

Sutherlandi. An orange-flowered form.

Nitida. Good bushy grower, white flowers.

Corbelle de feu. One of the finest specimen plants. Blooms of vivid coral-red.

PEOCUMBENT TYPES

Ricinafolia. Huge hairy leaves from the root bloom stalks 3 and 4 feet long, clusters of pink flowers 12 inches across.

Sanguinea. Dark olive foliage, bright red underside, very pretty white flowers.

Templini. Very ornamental, with large wavy leaves of red, white and yellow.

Verschafelti. Huge green leaves on fleshy stems, large clusters of pink flowers.

(Begonias continued)

SCHARFFIANS TYPES

- Scharffiana.** Bushy grower, beautiful fuzzy foliage grey-green above, red underneath, beautiful white blossoms on long stems. Very fine for baskets.
- Haageana.** More upright, leaves longer, large clusters of pendant flowers tinted pink. Very showy.
- Thurstoni.** Similar, with foliage dark and shiny, pink blossoms.
- Dorothy Grant.** A giant variety, with very large dark-varnished leaves, and white blossoms. A spectacular type. 4" pots, 75c.
- Viaude.** Like Scharffiana, taller with longer leaves and larger flowers.
- Metallica.** Handsome metallic foliage, large pink blossoms.
- Nellie Bly.** Bushy habit, grey and copper-green foliage, tinted pink flowers.
- Prunofolia.** Large hairy leaves, deep plum underside, large droopy white flowers. 75c.
- Fruticosa.** Leathery foliage varying from almost black to olive-green, red underside and white flowers.
- Marietta.** Beautiful wavy foliage of glossy dark green, dark red underneath. 4" pots, 75c.

CLIMBING KINDS

- Alba scandens.** Light green foliage and white flowers. Clings like ivy.
- Glaucophylla scandens.** A beautiful scandent variety with pink blossoms that makes one of the finest baskets we have seen. Very scarce. 4" pots, \$1.50.
- Marjorie Daw.** Much-branched climbing type with beautiful rosy-red blooms.

RARE TYPES

- Diadema.** Silver-spotted palmate foliage, tall grower. 75c.
- Superba.** Beautifully cut and spotted foliage. 75c.

BEDDING BEGONIAS

- Luminosa compacta.** Compact dwarf habit, brilliant scarlet flowers.
- Pink Pearl.** Compact, flowers of soft rose-pink.
- White Pearl.** Similar, with flowers of white.
- Carmen.** Beautiful bronze foliage, flowers pink.
- Carmine.** Light green foliage, deep red flowers.
- Many unnamed seedlings in white, pink, rose, scarlet and red.

(All above: 3" pots, 20c; 4" pots, 35c.)

TUBEROUS BEGONIAS

We believe our Tuberous Begonias to be unequalled anywhere at any price for size, superb form and sheer beauty of exquisite colors. These bulbs are from one of the finest strains in the world today. Blooming plants in pots are available all through spring and summer in the "camellia," "carnation," "cristata," "single" and Lloyd's or pendant types. A visit to our display gardens when these beautiful plants are in bloom is a rare treat. 4" pots, 35c; 5" pots, 50c to 75c; 6" pots, \$1.00 up.

BIGNONIA chere (South America) "Scarlet Climber"

Strong evergreen vine, blooming in spring and summer with large clusters of scarlet, trumpet-shaped flowers with yellow throat. Very showy and free blooming. Full sun, any soil. 60c and \$1.75.

BIGNONIA speciosa (South America)

Strong evergreen vine blooming in summer with clusters of violet, trumpet-shaped flowers. Uncommon. Full sun, any soil. 75c and \$2.00.

BIGNONIA tweediana (South America)

Vigorous evergreen vine, with large trumpet-shaped deep yellow flowers in spring and early summer. Will cling to masonry. Stands a great deal of cold. Full sun, any soil. 50c to \$1.50.

BIGNONIA venusta (South America) "Flame Vine"

One of the most brilliant flowering of all evergreen vines. Literally smothered in the middle of the winter with vivid clusters of flaming orange-scarlet flowers. Full sun, any soil. 75c and \$2.00.

BILLBERGIA nutans "Poor Man's Orchids"

Herbaceous plant, long narrow leaves, short stems of very unusual and curious flowers of blue, yellow and green, with rose-colored sheaths. Fine for shady rockeries and ferneries. Plenty of moisture. 4" pots, 35c; 6" pots, 50c.

BLETILLA hyacinthina "Chinese Orchid"

A beautiful and rare terrestrial orchid, with lovely lavender-mauve blossoms fine for cutting. Very easy to grow and the tubers multiply in the ground. Sun or shade, porous soil. 4" pots, in bloom, 50c; 6" pots, \$1.00.

BOMAREA caldaisiana (Peru) "Climbing Lily"

Evergreen twining plant allied to Alstroemeria. In summer has large umbels of very showy orange-colored flowers with dark spots, like small Tiger Lilies. A beautiful and rare plant for partial shady locations. Likes rich soil and moisture. 6" pots, \$1.50.

BOUGAINVILLEAS

EVANS & REEVES NURSERIES specialize in Bougainvilleas and we are constantly searching for new types of these exotic climbers for Southern California gardens. At this time we have several new varieties which will be released at a later date. In this climate, no plant from semi-tropic countries is more at home, more healthy and free of disease and pests, and more striking and showy than is the Bougainvillea. The vivid and glowing riot of color is one of the first things that catches the eye of people from the East and we believe that every garden in Southern California should have at least one or more Bougainvilleas. They should be planted in hot places and when the plants attain a good size, they should not be given too much water, as they will bloom much better. In fact, large specimens will go through the entire summer without much water.

BOUGAINVILLEA Braziliensis (South America)

The well-known species with the vivid magenta-colored flowers. Will stand more cold than the others. 50c and \$1.50.

BOUGAINVILLEA Crimson Lake (Belle of Panama)

The well-known variety with the brilliant crimson flowers, blooming in summer and fall. 50c and \$1.50 to \$3.50.

BOUGAINVILLEA lateritia

This variety is always scarce and quite different in color, with flowers of glowing brick red, blooming in the fall and winter. \$1.00 and \$2.00 and up.

BOUGAINVILLEA Praetorius (Golden Lake)

Here is the new sensation in Bougainvilleas and one of the finest novelties in many years. Flowers are a beautiful bronze-gold and the sun shining through them gives the effect of golden fires. Besides its other qualities, it is a profuse bloomer in the summer, fall and winter. Here is something that is truly "different" and when you see it, you will surely make a place for it in your garden. Very scarce. \$1.50 and \$3.00 to \$5.00.

BOUGAINVILLEA rosea (Rose Lake)

Here is the other outstanding member of the Bougainvillea family. This hybrid originated in Australia and many will consider it the finest of all. This one blooms in winter and spring and has enormous trusses of deep rosy pink flowers, an entirely new color in Bougainvilleas. Very spectacular and quite scarce. \$1.50 and \$3.50 to \$5.00.

BOUVARDIAS

Valuable small shrubs for partially shady locations. We grow several varieties with flowers of pink, coral and the fragrant white Humboldti, which is in great demand by florists for bridal bouquets, etc. 50c.

BOWKERIA gerardiana (South Africa) "Calceolaria Tree"

Strong-growing evergreen shrub, handsome dark green foliage, which turns to bronze with cool weather. Clusters of satiny white flowers shaped like a Calceolaria. A very unusual and valuable shrub. New introduction. Sun or partial shade, good soil, water. 60c and \$1.75.

**BRUNFELSIA floribunda (South America)
"Yesterday and Today"**

Here is a new plant that deserves a place in every garden. A medium size evergreen shrub of compact habit, with rich dark green foliage. The flowers open up deep violet and gradually fade to lavender and then

white. Yesterday's flowers are a different color today, hence its name. Blooms all through spring into the summer. Partial shade, moisture and good soil. Highly recommended. 75c and \$2.00 up.

CALLISTEMON brachyandrus (Australia)

Medium size evergreen shrub with pine-like foliage and bottle brush flowers of dark red, with golden anthers. Very pretty and unusual. Full sun, any soil. 50c and \$1.50.

CALLISTEMON floribunda (Australia)

Large evergreen shrub to about ten feet with flowers of cherry red. Perpetual bloomer and very showy. Full sun, any soil. 50c and \$1.50.

CALLISTEMON viminalis (Australia)

"Weeping Bottle-Brush"

An ideal small-flowering tree for the lawn or as a specimen anywhere in the garden. Slender, graceful, weeping habit, grows to about 15 feet and almost constantly in bloom. Long drooping flowers shaped like a bottle brush and of a vivid red color. An addition to any garden. Full sun, any soil. 60c and \$1.75 to \$3.00.

CAMELLIAS

We grow and stock a fine collection of these grand shade-loving plants with their gorgeous flowers. Many splendid varieties always available in different sizes, from 75c up to \$25.00.

CANTUA bi-color (Peru)

Medium size drooping evergreen shrub, with tubular-shaped flowers hanging down in long racemes. This variety has flowers of gold, scarlet and cream, beautifully veined. Full sun or partial shade, moisture and good soil. Very scarce. 60c and \$1.75.

CANTUA buxifolia (Peru) "Flower of the Incas"

Similar habit to the above, with flowers of bright carmine. A beautiful shrub. This plant comes from the country of the Incas and the story goes that the flowers were held in great esteem by them. 60c and \$1.75.

CAMPANULA isophylla

A lovely trailing campanula with soft grey foliage and large flowers of pure white. A beautiful thing for rockeries, hanging baskets, or shady walls. Partial shade, moisture and good soil. 3" pots, 25c; 4" pots, 35c.

CAMPANULA isophylla mayii

Same as the above with flowers of a beautiful soft shade of blue. Scarce.

CARISSA grandiflora (South Africa) "Natal Plum"

A very valuable ornamental evergreen bush with pure white, waxy flowers and large bright crimson fruits, like small plums, which are edible. One of the most valuable plants we have for foundation planting. Full sun, or partial shade, any soil, likes moisture. 60c and \$1.75.

CASSIA artemeisoides (Australia)

A valuable medium-sized evergreen shrub for dry, sunny locations. Finely cut silvery foliage and flowers of deep yellow. Ideal for desert gardens. 40c and \$1.50.

CASSIA splendida (South America) "Golden Wonder"

Here is a plant that will light up the garden with a blaze of golden color in winter, truly a "golden wonder." Spreading, much-branched evergreen shrub, six to eight feet, and in November and December is literally smothered with panicles of large golden yellow flowers. Extremely showy when in full bloom. New. Full sun, moisture and any soil. Will stand some cold. 60c and \$1.75.

CASSIA superba (South America)

Here is the sister to the above with a different habit, but just as spectacular. This is an upright-growing shrub to about ten feet and flowers in September and October. By planting both the above, you may have a succession of golden blossoms through the fall and early winter. Highly recommended. Hardy. 60c and \$1.75.

CASTANOSPERMUM Australe (Australia)

"Moreton Bay Chestnut"

Evergreen Chestnut, dark green foliage, spikes of red and orange flowers, many of them on the main branches and on the trunk itself. Very unusual and scarce. Stands cold. \$1.00 and \$2.50.

CALODENDRON capensis (South Africa) "Cape Chestnut"

Large evergreen tree, or sometimes semi-deciduous. Large panicles of lilac-colored flowers in late spring and summer. One of the most beautiful trees grown in California. \$1.00 and \$2.00 to \$3.00.

CALCEOLARIA rugosa (Perennial Lady Slipper)

Valuable small plants for either full sun, or partial shade, blooming all through spring and summer. We grow three varieties, with bronze, orange and yellow flowers, all of them extremely showy. Moisture and good soil. 3" pots, 25c; 4" pots, 35c.

CERATSOTIGMA willmottiana (China) "Chinese Plumbago"

Dwarf shrub, masses of deep blue flowers most of the year. Will grow anywhere, sun or shade, any soil, and is fine for naturalizing. Always attracts a great deal of attention in our gardens. 4" pots, 35c; gallon, 50c; 5 gallons, \$1.50.

CHORIZEMA grandiflora (South Africa)

Dwarf shrub with multitude of large orange and red flowers in early spring. Far superior to the common chorizema. Full sun or partial shade, light soil. 60c

CHRYSANTHEMUM Mawii (Morocco)

A very rare and unusual wild Chrysanthemum only recently rediscovered after having been lost to cultivation for many years. Makes a neat, compact little bush about 10 inches high and is literally covered with pink blossoms, fine for cutting. Full sun, not much water. 4" pots, 35c; gallon, 50c.

★ **CHRYSANTHEMUM (Korean hybrids)**

This new strain of "Mums," we consider to be one of the finest novelties brought out in recent years. Compact, bushy plants that seldom require staking and a wealth of gorgeous blossoms, most of them single or semi-double. This is one of the showiest border plants we have ever seen and almost unequalled for cut flowers. All the varieties listed below, including our own seedlings, are priced as follows: 3" pots, 25c; gallons, 50c.

Apollo. Sparkling combination of bronze, red and gold.

Aureum. Beautiful large semi-double of clear yellow.

Cardinal. Single, of glowing Chinese red. Very compact and free blooming.

Ceres. Old gold, blended with coppery bronze.

Doris. Large double, bronze red, overlaid with amber. Strong grower.

Ethel. Large semi-double of light amber.

Fireglow. Beautiful semi-double of burnt orange, with amber reverse.

Jane. Large single of dark wine-red.

Mars. Deep amaranth red changing to wine, late bloomer.

Mary. Amber red changing to coral pink.

Marjorie. Very large dark Chinese red.

Pink Perfection. Large single of beautiful soft lustrous pink.

Patricia. Large semi-double, pink overlaid with lavender.

Purity. Pure white single, very good.

Saturn. Single orange and bronze, fragrant.

Venus. Single lilac pink shaded with lavender. Fragrant.

CHAMAELAUCIUM ciliatum (Australia)**"Geraldton Wax Flower"**

New introduction and one of the best things brought in recently. Evergreen shrub 6 to 9 feet with feathery lemon-scented foliage. Bush is absolutely covered with graceful sprays of waxy white and pink flowers during the winter and spring. These flowers will last for ten days in water. This rare and aristocratic shrub is a great favorite in the gardens of the continent "down under" and is destined to occupy the same place in our gardens here. Full sun, any soil, not much moisture. \$1.25 and \$2.00 to \$3.00.

★ CISTUS OR ROCK ROSES

Valuable small shrubs for borders, banks or as individual specimens. In spring and summer they are a mass of bloom with flowers resembling single roses, all facing the sun. One of the showiest of all small shrubs. Any soil, full sun and not much moisture. All Cistus: 50c and \$1.50 to \$2.00.

CISTUS cyprius "Gum Cistus"

Beautiful large flowers of white, with dark brown spots at base of petals.

CISTUS crispus

Grey-green crinkled foliage with flowers of magenta pink.

CISTUS vaginatus

Large flower of rose-pink, with light throat. New.

CISTUS purpureus

Deep rosy mauve flowers 3 inches across, with maroon spots at base of petals.

CISTUS salvifolius

Profusion of smaller white flowers with yellow spots at center.

CLEMATIS montana (China)

Strong-growing deciduous, vine-covered in spring with masses of large pure white starry flowers. 50c.

CLERODENDRON spe. (East Africa)

Beautiful dwarf shrub with beautifully formed flowers of a lovely shade of light blue. Quite new. Sun or partial shade, good soil and moisture. Will not stand heavy frosts. 75c and \$1.75.

CLIANTHUS puniceus (New Zealand) "Parrot's Bill"

Scandent feathery-leaved shrub to about 5 feet, with bright red flowers in clusters resembling a parrot's bill. Full sun or shade, any soil. 75c and \$2.00.

COLEUS

We have one of the most complete collections in the south of these highly-colored foliage plants for protected shady places. All the old favorites and many new ones in well-grown bushy plants. 2¼" pots, 15c; 3" pots, 25c; 4" pots, 35c

CONVOLVULUS cneorum (South Europe) "Silver Bush"

Dwarf shrub, small silvery foliage, single pure white satiny flowers with pink striping on under side of petals. Very compact habit. Choice and attractive shrub for a sunny situation. Stands well on the sea coast and is resistant to cold. 50c and \$1.50.

CORREA pulchella (Australia) "Australian Fuchsia"

We consider this one of the neatest and finest evergreen shrubs that we have ever grown. Grows to about 2 feet and always looks neat any time of the year. All during the winter months it is covered with very pretty bell-shaped flowers of rose-pink. No one passes this shrub in our display gardens without stopping to admire it. Quite new and stock is limited. Sun or light shade, any soil. 75c and \$2.00 to \$3.50.

CORREA alba (Australia)

Medium-low-growing shrub, grey-green foliage, white bell-shaped flowers. Satisfactory plant under all conditions. Full sun, any soil, not much water. 50c.

COULTERIA tinctoria (China)

Small evergreen tree, handsome dark green pinnate foliage, yellow flowers in good-sized racemes, the seed pods turn reddish color and are quite handsome. Full sun, any soil. 50c and \$1.50.

COTONEASTER harroviana (China)

Tall-growing shrub with long arching branches, simply laden with shining red berries in winter. Full sun, any soil, water not important. 50c and \$1.50.

COTONEASTER Parnayi

In our opinion the most handsome of all the Cotonasters. Large evergreen shrub with good foliage and masses of very large vivid red berries, which remain on a long time and are not generally liked by the birds. Full sun, any soil. 50c and \$1.50 to \$2.50.

CROTALARIA agatiflora (East Africa)
"Humming Bird Flower"

Your friends will vote this one of the most interesting and ornamental plants in your garden, and it invariably attracts attention whenever seen. Large evergreen shrub with striking pinnate foliage and racemes of large green and gold, pea-shaped flowers which give the effect of canary birds hanging on the branches. One of the most novel and striking of all table decorations, when cut. Full sun, good soil and moisture. Cut back after blooming, usually in January. Very highly recommended. 75c and \$1.75 to \$2.50.

CUPHEA eminens (South America) "Firecracker Plant"

Medium size evergreen shrub with numerous spikes of red and orange flowers during the entire summer. A fine garden shrub. Sun or partial shade, good soil, moisture. 50c and \$1.50.

CUPHEA Melvillei (Brazil)

A new and extremely showy border plant. Low growing and covered with masses of bright crimson flowers with mauve and lavender centers. Constantly in bloom. Full sun, any soil, not much water. 50c.

DIANTHUS (Garden Pinks)

We grow a number of varieties of these useful border plants and particularly recommend "Ruth Elaine," a compact free-flowering variety with delicious fragrance. 3" pots, 25c; gallon, 35c.

DIERAMA pulcherrima (South Africa) "Wind Bells"

Evergreen bulbous plant making large clumps of long sword-like leaves to about three feet, drooping pink bell-shaped flowers hanging by a thin thread to long wiry stems from three and one-half to six feet tall. No more beautiful bulbous plant in existence. The sight of a group of these flowers swaying in the breeze is very charming. Highly recommended. Full sun, any soil. 60c and \$1.75.

NOTE: This year we will have a number of Dierama hybrids, in colors of white, pink, mauve, red and lavender. These novelties will be priced at \$1.00 and \$2.00.

DIMORPHOTHECA spectabilis (South Africa)

A new variety of this fine perennial with daisy-like flowers of a rich mauve. Full sun, light soil preferable. This is a grand novelty. 4" pots, 35c; gallon, 50c.

DIMORPHOTHECA ecklonis "Star of the Veldt"

The familiar perennial with the white flowers and blue center. Always good. Sun. 4" pots, 25c; gallon, 35c.

DIOCLEA glycinoides (South America)
"Evergreen Scarlet Pea"

Twining vine, belonging to the pea family, racemes of brilliant scarlet flowers which remind one of Wisteria. Very showy and should be used more. Full sun, any soil, water not important. Best of all in a very hot place. 50c.

DIOSMA Reevesi (South Africa) "Breath of Heaven"

Small heather-like shrub with very aromatic foliage and profusion of small white flowers in winter and spring. A most useful plant in the garden. Full sun or partial shade, any soil. 50c and \$1.50.

DIOSMA rosea (South Africa) "Pink Breath of Heaven"

New introduction. Resembles the well-known Diosma or Breath of Heaven in every particular, including fragrance, with the exception that the flowers, instead of being white, are bright rosy pink. 50c and \$1.50 to \$2.00.

DOMBEYA angulata (Australia) "Pom-pom Tree"

Strong-growing evergreen shrub or small tree, large handsome foliage, immense umbels of rosy flowers, which stand out above the foliage. In our opinion this is the best and showiest of the family. Full sun, good soil and moisture. 75c and \$1.75 to \$2.00.

DOMBEYA natalensis (South Africa)

Strong-growing evergreen shrub, clusters of pure white flowers covering the entire bush in winter. Very pretty. 50c and \$1.50 to \$2.00.

DISTICTIS cinerea (South America)
"Vanilla-scented Bignonia"

Strong-growing evergreen climber. Blooms eight months of the year with us. Large clusters of trumpet-shaped flowers, purple when they first open, shading to lavender, then to white; handsome foliage, very free flowering and delightfully fragrant. No one who has esteem for climbing plants should be without this. \$1.00 and \$2.00 to \$3.50.

DURANTA plumieri (South America) "Golden Dew-Drop"

Large evergreen shrub with hanging racemes of blue flowers on the ends of the branches, followed by waxy yellow berries. Full sun, any soil, water. 40c and \$1.50.

ECHIUM fastuosum (Madeira) "Pride of Madeira"

Medium growing plant blooming in early summer with great spikes of blue flowers flushed with pink. Very ornamental and particularly good in a hot, dry place. Full sun, light soil, not much moisture. 50c and \$1.50.

EPIDENDRUM O'brieni (Mexico)

"Everblooming Ground Orchid"

Imagine orchids growing out in your garden and blooming the entire year around. That is what you can have with this marvelous plant from below the Rio Grande. This is a terrestrial orchid with large heads of cinnabar red flowers on long stems four to seven feet tall. In our opinion there is no more beautiful flowering plant of its kind than this orchid. Plant in partial shade with a loose, peaty soil and once it becomes established it will bloom practically every day. It is very easy to grow and will stand a few degrees of frost. Highly recommended. 4" pots, 75c to \$1.50. Larger plants from \$2.00 to \$15.00.

ERANTHEMUM pulchellum (Tropical America)

Low-growing shrub, handsome foliage, spikes of deep blue flowers on the ends of the branches. Good winter bloomer. Partial shade, good soil and moisture. 50c and \$1.50.

ERICA melanthera rubra (African Heather)

Medium - growing evergreen shrub with deep rose flowers all along the stems. Very showy in the fall and winter. Full sun, acid soil, not much moisture. 40c and \$1.50.

★ **ERYTHRINAS OR CORAL TREES**

The Erythrinas or Coral Trees are among the most beautiful and striking trees in our gardens. They are all of them extremely floriferous and when in flower light up the whole garden with vivid masses of color. They should be extensively planted in localities not subject to heavy frosts. By planting three or four varieties, some will be in bloom every day in the year. Plant them in full sun, any soil and lots of water.

ERYTHRINA caffra (South Africa)

Makes in time a large tree. In winter and early spring is literally a sheet of scarlet bloom. One of the showiest trees in existence and a beautiful picture. \$1.00 and \$2.00 to \$3.50.

ERYTHRINA coralladendron (South Africa)

Massive spreading shrub. Covered in spring and summer with long, heavy spikes of scarlet flowers. Strongly recommended. \$1.00 and \$2.00 to \$3.50.

ERYTHRINA crist-galli (South America)

Very similar to the preceding, color is sometimes darker, with more crimson in it. Very free blooming and showy. 75c and \$1.75 to \$2.50.

ERYTHRINA herbacea (Texas and Mexico)

A herbaceous coral plant dying down to the ground every winter, spikes of bright scarlet in summertime. Uncommon. 75c and \$1.75 to \$2.50.

ERYTHRINA indica (India)

Good-sized tree, spikes of vivid wine-colored flowers in the early spring. One of the handsomest of all the Coral Trees and scarce. \$1.50 and \$2.50 to \$3.50.

ERYTHRINA poianthe (Philippines)

A large spreading shrub or small tree, blooms after the old leaves fall off in early spring, when it is literally a sheet of vivid scarlet spikes. One of the most striking objects which can be imagined. In our opinion one of the most showy and desirable of all the Corals. \$1.00 and \$2.50 to \$3.50.

ERYTHRINA poeppigiana (American Tropics)

A good-sized tree, handsome foliage, covered in the summer with erect spikes of scarlet flowers like canelabra. Rare. \$1.50 and \$2.50 to \$3.50.

ESCALLONIA langleyensis (South America)

Medium size evergreen shrub with large heads of rosy pink flowers in summer. Full sun, any soil, likes water. All Escallonias are particularly fine near the sea coast. 40c and \$1.50.

ESCALLONIA montevidiensis (Montevideo)

Vigorous evergreen shrub, large terminal corymbs of white flowers covering the entire bush. 40c and \$1.50.

ESCALLONIA organensis (South America)

A somewhat dwarf growing evergreen shrub, handsome dark green foliage, the young shoots being a reddish color. Rose-pink flowers. The most beautiful of all the Escallonias. Rare. 75c and \$2.00.

EUGENIA hookeri (Australia)

Large erect tree, evergreen, with large clusters of dark purple fruits. Eugenias like shade or sun, any soil and moisture. 40c and \$1.50.

EUGENIA myrtifolia (Australia) "Brush Cherry"

Erect columnar tree with rich green leaves and red fruits. Useful as a specimen tree or for hedges. 40c and \$1.50.

EUGENIA Smithii (Australia) "Lili-pilli Tree"

Symmetrical growing evergreen tree having the most ornamental berries of all, being of a beautiful orchid shade. Highly prized as table decorations. This is, in our opinion, the finest of all the Eugenias and we strongly recommend it. 50c and \$1.75 to \$2.50.

EUGENIA uniflora (Brazil) "Surinam Cherry"

Large spreading shrub with glossy foliage and large edible fruits like strawberries. 60c and \$1.75.

★ BRILLIANT FLOWERING DWARF EUCALYPTI

All the Eucalypti listed below are from Western Australia, some of them having actually only been discovered in the last few years. They are all extremely free flowering with brilliant blossoms in clusters or drooping racemes and, above all, they are all dwarf trees or shrubs of graceful habit and restrained root growth. They should not in any way be confused with the large trees of this family, whose roots prove such a problem in the average garden. We have tested these new trees out and recommend them very highly. They are "different."

EUCALYPTUS Angulosa (Western Australia)

Free flowering, pale salmon flowers, grows to 8 feet. New. 75c and \$2.00.

EUCALYPTUS Caesia (Western Australia)

Slender weeping tree to about 15 feet, attractive russet-brown trunk, white branches and silvery-gray foliage. The tree blooms almost continuously, having rose-pink flowers with golden stamens in long drooping racemes. A very beautiful and aristocratic tree. Highly recommended. New introduction. \$1.00 and \$2.50.

EUCALYPTUS Desmondensis (Western Australia)

Weeping habit, dense golden flowers, grows to 8 feet. New. \$1.00 and \$2.50.

EUCALYPTUS Erythrocorys (Western Australia)

Tree to about 20 feet, white trunk, vivid scarlet-colored flower caps, large heads of golden-yellow flowers. Very beautiful and distinctive. New introduction and rare. Strongly recommended. \$1.00 and \$2.50.

EUCALYPTUS Ficifolia (Western Australia)

The true species, small bushy tree, masses of orange-colored flowers. 50c.

EUCALYPTUS erythronema

Dwarf, slender tree with clusters of deep crimson flowers in large clusters in such quantities as to almost smother the tree. New. 75c and \$2.00.

EUCALYPTUS Forestiana

Dwarf tree of shrubby growth, with fine foliage and beautiful bright golden flowers. Particularly useful for background effects. 75c and \$2.00.

EUCALYPTUS grossa

Dwarf tree of bushy growth and larger blue-green foliage, flowers of golden yellow. 75c and \$2.00.

EUCALYPTUS Pyreiformis (Western Australia)

Small slender-growing tree, drooping clusters of very large crimson flowers with golden stamens, flowers measure three inches across. Quite spectacular in bloom. New introduction. Highly recommended. \$2.00 and \$3.50 to \$5.00.

EUCALYPTUS Macrandra (Western Australia)

Golden flowers, grows to 10 feet. New. \$1.00 and \$2.50.

EUCALYPTUS Macrocarpa (Western Australia)

Never attains a height of more than ten or fifteen feet. Very handsome glaucous foliage similar to the young foliage on the common Blue Gum. In the axils of the leaves are individual deep rose-pink flowers with beautiful golden stamens. We have measured flowers 4½ inches across. Very beautiful and rare. New introduction. \$2.50 and \$5.00 to \$8.00.

EUCALYPTUS Nutans (Western Australia)

Bright red flowers, very good for decoration. Grows to six feet. An entirely new introduction, only recently discovered. Said to be one of the finest of the family. \$1.00 and \$2.50.

EUCALYPTUS Spathulata (Western Australia)

Large golden flowers, very hardy, grows to 15 feet. 75c and \$1.50.

EUCALYPTUS supulcralis

Graceful weeping tree like a small weeping willow, with handsome gold flowers. \$1.00 and \$2.50.

EUCALYPTUS torquata

Slender, graceful tree, reddish trunk and branches, large clusters of curiously shaped buds of vermillion opening to flowers of rose. 75c and \$2.00.

LARGER GROWING EUCALYPTI

EUCALYPTUS ficifolia "The Flaming Gum"

Bushy trees to 30 feet with heavy masses of brilliant scarlet flowers, one of the showiest trees planted in California. Our plants are grown from specially selected seed and should run quite true to color. 50c and \$1.50 up.

EUCALYPTUS citriodora "Lemon-Scented Gum"

One of the tall trees of the family, very ornamental and graceful with smooth, silvery trunk and deciduous bark. Extremely useful for landscape effects. Foliage is strongly lemon-scented. 50c and \$1.50.

EUCALYPTUS polyanthemos

Tall tree with spreading habit. Leaves shaped like a poplar tree. One of the most valuable for landscape work where open effects and shade patterns are desired. 50c and \$1.50 to \$2.00.

EURYOPS athanaisie (South Africa) "African Bush Daisy"

Low evergreen shrub to about four feet, trunks and limbs covered with whitish pubescence. Large bright golden daisy-like flowers on long stems. Constant bloomer through the winter months and one of the finest plants in the garden for cutting. Full sun, light soil preferable, not much water. We cannot recommend this too highly. 50c and \$1.50.

FERNS

We stock a large variety of ferns in many different sizes, reasonably priced from 35c up. Australian tree fern from \$1.00 up.

FREMONTIA californica (California and Mexico)

Large evergreen shrub or small tree with a profusion of large, deep golden, saucer-shaped flowers. When used properly, this is one of the showiest of all our natives. Full sun, light porous soil and very little water. 75c and \$1.50 to \$2.00.

EVANS & REEVES NURSERIES attract visitors from all over the state during the spring and summer to see the gorgeous display of hundreds of **Fuchsias** in hanging baskets. If you enjoy a lovely riot of color and if you want to see **Fuchsias** at their best, then you cannot miss a trip to these nurseries from **April to October**. Bring your friends, it will be a real treat.

★ FUCHSIAS

EVANS & REEVES NURSERIES are famous as the home of one of the world's finest Fuchsia collections, comprising over 300 varieties, many of them our own originalities. From this large collection we have carefully selected those Fuchsias which we honestly believe represent our outstanding varieties for 1937. The list offered below, we consider not only the finest of the respective colors, the best foliage and blooming habits, but the most satisfactory to grow under average garden conditions. You will not find a better collection anywhere at any price. EVANS & REEVES Fuchsias are "DIFFERENT."

CULTURE OF FUCHSIAS

Fuchsias like a cool, partially shady location, rich soil, with plenty of humus. Keep the plants well mulched with peat moss, leaf mold, or well-rotted manure. Never let the ground dry out during hot weather. Feed the plants every two months with light applications of a well-balanced fertilizer during growing season. Let them rest during the winter and prune back before new growth starts during the early spring. Follow these few simple rules and you will be rewarded with a breath-taking display of gorgeous bloom during the spring, summer and fall.

PRICES—All varieties (except where noted): 4" pots, 35c; 6" pots, 75c. Larger specimens from \$1.00 up, according to size and variety.

WHITE SORTS

Aviator. Long beautifully shaped flowers, corolla white, with long twisted sepals of deep rose-red. Vigorous grower. The best single white Fuchsia.

Dainty Lady. Large perfectly - formed flowers, corolla white-streaked carmine, sepals deep red, semi-double. Very compact habit, making perfect pot plant. A beauty!

Pride of Orion. Very large loose double flowers, corolla ivory white, streaked cerise, wide deep crimson sepals. One of the aristocrats of the family and the finest double white Fuchsia. No collection should be without this one.

Rolla. One of the most beautiful of all Fuchsias. Large double flowers of snowy white, with waxy white sepals, lightly flushed pink on the underside. Medium growing.

Schneewitchen. This one will be near the top of the list in any collection. Dainty waxy white single flowers, delicately tinted pink. Compact habit, deep green foliage. 4" pots, 50c; 5" pots, \$1.00.

PINK SORTS

Glendale (An E. & R. Origination). A very strong, vigorous plant with a profusion of dainty single coral-pink flowers. A novelty of great merit. 4" pots, 50c; 6" pots, \$1.00.

Fascination. One of the showiest of all. Large loose double flowers, beautiful rosy-pink corolla, with deep pink sepals. Very free blooming. Well named.

Rose of Denmark. This beautiful and scarce variety is considered by many as the finest of all. Although not a large flower, it is absolutely in a class by itself. Medium size single flowers, the corolla being a soft lustrous rose, with waxy white sepals of delicate flesh color. Limited stock of this variety. 4" pots, 75c; 6" pots, \$1.50.

Santa Monica (An E. & R. Origination). Particularly valuable because of its late blooming habit, flowering profusely through the fall right up until Christmas time. Large double flowers of flesh pink, streaked cerise, with bright red sepals.

Ernest Renain. An extremely showy, vigorous plant, large single flowers of deep rose with waxy white sepals. A beautiful contrast.

ORANGE SORTS

Aurora Superba. A magnificent Fuchsia with large single flowers, corolla of vivid apricot and sepals of light salmon. Very choice.

Amy Lye. One of the most satisfactory of all Fuchsias, having strong, compact habit of growth and a profusion of blossoms throughout the entire season. Single flowers of coral-orange, with waxy white sepals. Highly recommended.

Swanley Yellow. A fine old favorite, with very large ornamental foliage. Long single flowers of orange-yellow and salmon sepals.

California (An E. & R. Origination). A tall, vigorous grower, light green foliage, large single flowers, corolla of bright orange, sepals light coral-pink. 50c and \$1.00.

RED SORTS

President. Extremely vigorous, tall-growing plant with reddish foliage. Large single flowers of dark burgundy red. Particularly valuable as a climber or for tall background specimen.

Pride of Exeter. A strong spreading type that has perfectly beautiful, large, semi-double flowers of cerise suffused with violet, long, large sepals of light rose.

Beverly Hills (An E. & R. Origination). We are proud to offer what we consider the finest of the new single Fuchsias with the old Fuchsia colors, red and purple-red. This plant is a strong grower with enormous single flowers, corolla being a wonderful shade of burgundy red, long elegant sepals of glowing pink with white striping. An aristocrat among the singles. 4" pots, 75c; 6" pots, \$1.50. (Not available until May, 1937.)

LIGHT ROSY-BLUE SORTS

Constance (A Budgen Origination). Semi-double flowers of blue-tinted pink with flesh-colored sepals. Very compact habit and quite a distinct color in Fuchsias.

Nonpareil. A variety that always attracts a great deal of attention. Large semi-double flowers of rich, rosy, blue-violet with sepals of ivory-white, tinted flesh. Very free flowering and showy.

MAUVE, VIOLET AND PURPLE SORTS

Gypsy Queen. The queen of the mauve sorts! Enormous double flowers of rich rosy-mauve with heavy deep-red sepals. Tall, vigorous grower and a variety that must be included in every collection. Many enthusiasts place it number one on the list! 4" pots, 50c; 6" pots, \$1.00.

Dr. Vance (An E. & R. Origination). Large loose double flowers, beautiful violet petals flushed and veined cerise, sepals of vivid red. One of our best novelties of 1936.

Heron. The best single in this color range. Very large flowers of prune color with deep crimson sepals. Profuse bloomer.

Jules Daloge. Giant double flowers in a beautiful combination of rich violet, lavender and rose, with deep crimson sepals. One of the very finest.

Mr. Gladstone. Very large double flowers of rich purple, making a gorgeous display when in full bloom. Will always be one of the best.

Rose Queen. A very distinct variety, tall-growing and vigorous, with lovely soft green foliage. Large double flowers of clear violet, flushed lilac with rose shadings, bright red sepals.

Royal Purple. Handsome semi-double flowers of dark royal purple and dark crimson sepals. The darkest of all the purple varieties.

The Chief (An E. & R. Origination). This is one of our finest novelties for this year, and will take its place among the spectacular Fuchsias. We believe the name we have given it aptly describes this enormous double flower of dark rich violet with some of the petals flushed cerise and the sepals of dark carmine. 4" pots, 50c; 6" pots, \$1.00. (Not available until May, 1937.)

TRIPHYLLA TYPES

NOTE: These types are distinguished by their clusters of long tubular flowers, sometimes called the "Firecracker Fuchsia," and their beautiful glossy foliage. They are all compact in habit, are profuse bloomers and will stand more sun than other varieties.

Koralle. Light green glossy foliage, flowers of rich coral.

Lady Claire (An E. & R. Origination). Glossy dark green foliage, flowers of cerise and orange.

Thalia. Dark glossy foliage of plum color, flowers of scarlet.

TRAILING AND WEEPING TYPES

(Suitable for hanging baskets, window boxes, trellis, etc.)

Balkon. Trailing habit. Dainty, light pink, single flowers. Very pretty.

Covent Garden. Semi-trailing. Very showy, large, single flowers of rich rose with sepals of waxy white.

Orange Glory. Semi-trailing, or climbing. Beautiful long flowers of vivid orange and sepals of delicate salmon. One of the very best, and extremely showy.

Marinka. Semi-trailing. Vigorous free bloomer with large single flowers of a most vivid red. Very fine in baskets.

The Doctor. Semi-trailing. Large, single flowers of rose-pink with salmon-pink sepals. A real beauty.

NOTE: Nonpareil and Aurora Superba also make wonderful hanging basket specimens.

"A NEW CLIMBING FUCHSIA"

Westwood (An E. & R. Origination). A slender-growing plant that will climb up the side of a trellis or wall to over ten feet. Long slender flowers, white corolla and long twisted sepals of light red. A novelty of great merits. 4" pots, 50c; 6" pots, \$1.00. (Available in May, 1937.)

FUCHSIA SPECIES

FUCHSIA baccularis (Mexico)

Pretty bushy plant, small light green foliage, masses of small delicately-formed blossoms of light waxy cerise and vermillion. Quite distinct.

FUCHSIA corymbiflora alba

Same habit as preceding. Petals of deep pink with very long white tubes.

FUCHSIA corymbiflora (Peru) "Tree Fuchsia"

Tall and spreading, large lustrous foliage, very long brilliant red flowers borne in clusters. A beautiful and aristocratic plant. 50c and \$1.50.

FUCHSIA serratifolia (Peru)

Long tube of waxy cerise, fading to blush, green-tipped sepals and petals of bright orange. Quite scarce.

FUCHSIA magellanica alba (Brazil)

Strong grower, light green foliage, myriads of small single flowers of very delicate lavender, sometimes pure white. New.

FUCHSIA splendens (Mexico)

Vigorous grower, almost a climber. Masses of small single flowers with bright red tubes, both petals and sepals green. Very unusual.

FUCHSIA virgata (Mexico)

Very compact, tall grower, small neat foliage, profusion of small graceful red and purple flowers. Stands full sun.

NOTE: Many other species too numerous to list.

FELICIA rotundifolia

Low border plant with pretty bright blue daisy-shaped flowers. Full sun. 3" pots, 15c; gallon, 35c.

GAZANIA pavonia hybrids (South Africa)

Marvelous free-flowering plants for along borders or on banks for a grand display of color. These splendid hybrids come in beautiful shades of white, cream, pink, orange, bronze, red and combinations of these colors. Much larger flowers, longer stems and all-around better plants than the older types. 2¼" pots, \$1.00 per dozen; 3" pots, 20c each.

GARDENIA grandiflora

In our opinion the best garden Gardenia, with fine large foliage and marvelous large flowers of creamy white. Plant in warm, protected situation, acid soil with good drainage. 75c and \$2.00.

GARDENIA thumbergi (South Africa)

A very rare Gardenia with rigid stems and foliage, growing into a large shrub. Large single flowers with very long tubes and intensely fragrant. Very scarce. Full sun, acid soil, water with good drainage. 5 gallons, \$2.50.

GELSEMIUM sempervirens (Southern United States)

"Carolina Jessamine"

Medium-growing evergreen twining vine. Masses of yellow trumpet-shaped flowers in winter. Will grow in sun or shade, any soil, and stand cold. Valuable medium height climber. 60c and \$1.75.

GOSSYPIUM sturtii (Western Australia) "Desert Rose"

Medium-sized shrub belonging to the Hibiscus family. Bears an abundance of single cup-shaped flowers about three inches across, lavender in color, with dark center. Very showy and unusual. 60c and \$1.75.

GOODIA lotifolia (Australia)

Slender, graceful shrub, with fern-like foliage, racemes of golden pea-like flowers which are very pretty. Sun, or partial shade, any soil. New. 75c.

GREVILLEA obtusifolia (Australia)

Evergreen prostrate and trailing shrub, admirable for a ground covering, neat dark green foliage, red flowers very similar to *G. thelemanniana*. We know of no finer or more attractive evergreen prostrate shrub than this. It is very sure that when it becomes better known, this *Grevillea* will be planted by the thousands for banks and terraces. New introduction. 2¼" pots, \$1.50 per dozen; 4" pots, 35c each.

GREVILLEA paniculata (Australia)

Evergreen shrub with spreading habit, sending up tall slender branches from the center, blooms several times a year with a profusion of foamy white fragrant flowers. 2¼" pots, \$2.00 per dozen; 4" pots, 50c each; gallons, 75c.

GREWIA asiatica

Evergreen shrub with slender arching branches, an ideal plant to espalier against wall or trellis. Pretty star-shaped flowers of violet-lavender with gold centers. 75c and \$2.00.

GREWIA caffra (South Africa)

Similar to the preceding with somewhat smaller flowers of lilac color. 50c and \$1.50.

HARDENBERGIAS (Australia)

Medium growing evergreen vines or shrubs with sprays of white or violet-colored flowers in late winter and early spring. One of the most valuable medium height climbers. Sun or shade, any soil, likes moisture. All varieties as follows: 60c and \$1.50 to \$2.00.

Hardenbergia bimaculata. A prostrate, trailing shrub, fine for ground cover, or for low walls. Covered with sprays of lovely deep lilac flowers, largest of all.

Hardenbergia comptoniana. The familiar climber with the five-fingered leaves.

Hardenbergia monophylla alba. The graceful variety with the pure white flowers. Shrub or vine.

Hardenbergia purpurea. Similar to *comptoniana*, with larger, deeper flowers and larger, different foliage.

HARPULLIA pendula (Queensland)

Tall evergreen tree, inconspicuous flowers, the beauty of the tree consisting in the brilliant seed clusters, jet-black seeds surrounded by a calyx, the color of crushed strawberries. \$1.00 and \$2.50.

HELIOTROPE "Black Beauty"

A beautiful new variety of this old-fashioned garden favorite. Glossy black foliage and intensely dark violet blossoms. Full sun, good soil, water. 4" pots, 35c; gallon, 50c.

HELIANTHEMUM formosum (Spain and Portugal)

"Sun Rose"

Makes a small bush about two feet in height and three feet through. Small silvery-grey foliage, yellow flowers, like small single roses, purple at the base, about two inches across. Full sun. Highly recommended. 50c and \$1.50.

HELIANTHEMUM ocymoides (Spain) "Sun Rose"

Somewhat similar to the preceding with the exception that it grows taller. Abundant yellow flowers with a dark eye about an inch and a half across. Very pretty and free flowering, being in bloom nearly all the time. Full sun. Highly recommended. 50c and \$1.50.

HEMEROCALLIS "Day Lilies"

Strong, easily-grown perennials for the front border, beautiful lily-like flowers of various shades of yellow, bronze and orange. Sun, or partial shade, good soil and plenty of moisture. Highly recommended. From 35c up. New varieties, 50c and up.

HEDYCHIUM "Ginger Lily"

A decorative, tropical plant, with exotic, spicy fragrant flowers. Splendid thing near pools. Easy to grow, sun or shade, good soil, lots of moisture. Strong divisions of all varieties, \$1.00. Larger clumps, \$2.00 up.

Coronarium. Pure white, used by the Hawaiians for their leis.

Aureum. Bright orange. One spike will scent the whole room.

Gardnerianum. Light yellow with red filaments, followed by red fruits.

HIBBERTIA volubilis (Australia) "Wax Rose"

Medium growing evergreen vine, light glossy green foliage; large, waxy, golden flowers of good substance, somewhat like single wild roses. A rare and very beautiful climbing plant that excites the admiration of everyone. Highly recommended. Came through recent freeze without damage. Partial shade or sun, good soil and moisture. \$1.00 and \$2.00 to \$3.00.

★ HIBISCUS ROSA-SINENSIS AND HAWAIIAN HYBRIDS

EVANS & REEVES NURSERIES are probably the largest growers in the country of these beautiful and exotic plants and many of the new hybrids now on the market have been disseminated from our nurseries. We are constantly importing or originating new varieties and will release them from time to time.

These beautiful plants can hardly be surpassed as flowering shrubs in localities free from heavy frost. They do not as a rule receive the treatment in the ordinary garden which they deserve. They like plenty of sunshine, a rich soil, good feeding in spring and summer and an abundance of water. A good way to grow them is to make a basin in the spring around each plant, fill it with manure and keep the plant well irrigated during the summer. Grown in this way, the foliage will be green and lustrous and they will produce an abundance of gorgeous rich, glowing blooms. They are never satisfactory if kept starved for food and suffering from lack of water.

The Hibiscus listed below are most of them new or comparatively new. The majority of them hold their flowers for two and three days where the old varieties did not last more than one day. (Prices quoted are for plants in one gallon and five gallon containers respectively.)

WHITE SORTS

- **Purity.** One of the aristocrats of the family. Makes a large bush or small tree. Covered all summer, fall and early winter with clusters of pure white flowers, long red column. Flowers are delightfully perfumed. We consider this one of the finest Hibiscus grown. \$1.50 and \$3.00 to \$5.00.
- ✓ **Queen of the Islands.** Large, pure white, beautifully-shaped flowers, with red columns. Bushy, compact habit. 75c and \$2.00.
- **White Wings.** Large white, "windmill" shaped flower with red column and maroon throat. Flowers last three days. A very good garden sort, because of its bushy, compact habit and makes an excellent hedge. 60c and \$1.75.

RED SORTS

- **Brilliant.** An old favorite, bushy habit, brilliant red flowers, free bloomer. 60c and \$1.75.
- **Prince Takamoto.** One of the largest flowers of all Hibiscus. Glowing, velvety-red flowers of enormous size. Very beautiful. 75c and \$2.00.
- **Royal Red.** A new red, good bushy habit, bright scarlet flowers shaded crimson. 60c and \$1.75.
- **Red Giant.** Enormous double flowers of dark crimson, shaded burgundy. Heavy luxuriant foliage. Offered, we believe, for the first time. \$1.00 and \$2.50.

PINK SORTS

- **Agnes Galt.** One of the largest and showiest of flowers of the entire group. Not new but still one of the very best of all Hibiscus. Enormous velvety flowers of bright rose-pink, 60c and \$1.75.
- **Kauai.** Vigorous, healthy habit, making good-sized bush. Huge carmine-pink flowers with reflexed petals. Good winter bloomer. 60c and \$1.75.
- ✓ **Pink Beauty.** Heavy luxuriant foliage, compact habit. Very large flowers of light amber pink. 60c and \$1.75.
- **Pink Shell.** Beautiful large fluffy flowers of soft shell-pink. Quite distinct. 60c and \$1.75.
- ✓ **Mrs. Wilder.** Ideal garden variety, having bushy habit and being profuse bloomer. Shell-pink flowers with carmine center. 60c and \$1.75.

YELLOW SORTS

- **California Gold.** One of the finest Hibiscus grown and our favorite gold variety. Beautifully-shaped flowers of enormous size, petals pure, clear gold, shading into rich carmine in the throat. Really a flower of breath-taking beauty. Stock limited. \$1.00 and \$2.50.
- ✓ **Golden Vase (An E. & R. Origination).** Lovely flowers of deep lemon-yellow, petals of the "windmill" type. Heavy dark green foliage. A very fine variety. 75c and \$2.00.
- **Dorothy McKee.** Medium grower, with flowers of deep gold and golden column. 75c and \$1.75.
- ✓ **Mauna Loa.** Large finely-shaped blossoms of clear yellow, sometimes shaded burnt amber. Heavy luxuriant foliage. A choice variety. \$1.00 and \$2.50.
- ✓ **Pride of Bel-Air.** New and very beautiful variety, with large perfectly-formed flowers of straw-yellow with golden column. Quite distinct. Stock very scarce. \$1.00 and \$2.50.
- ✓ **Papeete.** Good-sized flowers of orange-yellow lightly suffused with coral-pink. Another new one. 75c and \$2.00.
- **Champion.** Very large double flowers of pure deep gold, something quite new in a double Hibiscus. 75c and \$2.00.
- **Crown of Bohemia.** We claim this magnificent flower to be the finest of all double Hibiscus in our collection. Enormous loose double flowers of deep golden yellow, overlaid with amber and apricot and shading into bronze and cerise in the center of the flower. Limited stock of this one. \$1.25 and \$2.75.

AMBER SORTS

- **Kamepuia.** A new and magnificent variety. Very large, perfectly-formed flowers with overlapping petals. Ground of light clear cerise, overlaid and suffused with coral and amber, underside edged with gold. Will be scarce for a long time. \$1.25 and \$2.75.
- **Luna.** As glorious as a tropical moon is this beautiful flower of rich golden amber, delicately overlaid with tones of cream and coral. Large, handsome foliage of deep green. One of the finest of all. \$1.00 and \$2.50.
- **Mayo Jane.** Beautifully-shaped large flowers of rich ivory, shaded straw-yellow and edged with gold. Quite new and distinct. Scarce. \$1.00 and \$2.50.

FLAME SORTS

- ✓ **Eleanor Gartley.** Very large wavy flowers of copper-pink. A very free-blooming and lovely variety. 60c and \$1.75.
- **Flame.** Large scarlet flowers suffused geranium. Not a new one, but still one of the most satisfactory garden Hibiscus. 60c and \$1.75.
- ✓ **Muriel Evans.** One of the most profuse bloomers of all Hibiscus, with plenty of flowers right on past Christmas time. Blossoms of orange-scarlet, veined coral, gold and pink. 75c and \$2.00.
- **Oahu.** Large, handsome flowers of dark flame-amber with chocolate throat. This one, too, is a good winter bloomer. 75c and \$2.00.
- **Pele.** Reminiscent of a South Seas sunset is this magnificent variety that will win a place in every collection. An enormous, perfectly-formed flower of unsurpassed beauty; deep, glowing flame, suffused with a glorious shade of cerise, underside edged with gold. Stock of this variety very limited. \$1.00 and \$2.50.
- **Rainbow.** A compact plant, with heavy, luxuriant foliage. Large flowers of a real bronze-scarlet, veined with tones of coral, amber and flame. A new one and well named. 75c and \$1.75.

HIBISCUS SPECIES

HIBISCUS arnottianu

(Mountain ranges of the Hawaiian group)

Tall growing Hibiscus, eventually making a tree, covered in summer and autumn with quantities of pure white flowers with red column. This has the unusual feature in Hibiscus of being fragrant. One of the hardiest of the family and very beautiful. Scarce. 75c and \$1.75 to \$2.50.

HIBISCUS chrysantha (South Africa)

Low growing shrub, bright green foliage, deep yellow flowers with maroon eye. Very pretty. 50c and \$1.50.

HIBISCUS diversifolius (Australia) "Trailing Hibiscus"

Trailing species, large yellow flowers with dark center, finely cut foliage, very free bloomer. Naturalizes itself well. 2½" pots, 15c; gallon, 40c.

HIBISCUS heterophyllus (Australia) "Tree Hibiscus"

Tall growing shrub, handsome dark green cut foliage, very large white flowers with pink tinge, deep maroon center. This is not new, but quite uncommon. 75c and \$2.00.

HIBISCUS manihot (China) "Hollyhock Hibiscus"

Better grown as an herbaceous plant. Large primrose-yellow flowers with maroon center, often seven inches across. 50c and \$1.50.

HOLMSKIOLDTIA sanguinea (India) "Parasol Flower"

Can be grown either as a shrub or a climber. Literally covered with racemes of glowing brick-red bracts. One of the most beautiful and showy shrubs introduced in recent years. This plant in full bloom is an ornament to any garden. Full sun, good soil, lots of water. 75c and \$1.75 to \$3.00.

HOYA carnosa (Australia) "Wax Flower"

Evergreen twiner, thick leaves, large umbels of waxy, flesh-colored flowers in clusters about four inches to five inches across. A fine thing for shady porches. Should not be planted in the sun. 4" pots, \$1.00; 6" pots, \$2.00 and \$2.50.

HOMALANTHUS populifolius (Australia)

Small evergreen tree, large dark green leaves shaped like a poplar, which turn rich glowing red when cold weather comes. Valuable for autumn tints. 50c and \$1.50.

HYMENOSPORUM flavum (Australia)

Makes a tall, slender, shapely evergreen tree, covered in spring and summer with clusters of tubular, yellow, fragrant flowers. Full sun, good soil and water. 75c and \$2.00.

HYDRANGEAS

We grow many varieties of these showy shade-loving plants in all sizes. Gallons (according to variety), 35c up; 5 gallons (according to variety), \$1.25 up.

HYPERICUM calycinum (Aaron's Beard)

Low, woody evergreen to one foot; large yellow flowers in the spring. Likes partial shade and good, moist soil. 40c.

HYPERICUM moserianum (The Gold Flower)

Grows to about two feet high in a low, compact mound with golden flowers almost all through the summer; likes partial shade and plenty of moisture. 40c and \$1.50.

HYPERICUM quarterianum (Giant St. John's Wort)

An improved variety of the St. John's Wort, growing to eight or nine feet and with very large golden flowers. Sun or shade, any soil, water. This is quite new. 75c.

INGA pulcherrima (Mexico) "Flame Bush"

Very feathery pinnate foliage, makes in time a large spreading evergreen shrub, in spring and summer and often in winter a sheet of vivid scarlet fluffy heads of flowers shaped like a pom-pom, an unusually beautiful shrub. Rare. Sun or partial shade, any soil, moisture. 75c and \$2.00 to \$3.00.

JACARANDA mimosaeifolia (South America)

Half evergreen tree to 40 feet, fern-like foliage and in the spring the entire tree is a mass of violet-blue tubular flowers borne in clusters; one of the handsomest flowering trees grown in Southern California. 50c and \$1.50.

JACQUEMONTIA coerulea (Mexico) "Blue of Heaven"

Twining vine, small greyish-green foliage, covered all summer with a profusion of sky-blue convolvulus flowers about the size of a quarter. A rare and beautiful climbing plant. Highly recommended. Full sun, light soil. 4" pots, 75c; 6" pots, \$1.50.

JASMINUM azoricum (Azores) "Canary Jessamine"

Evergreen twiner, very dark green handsome small foliage, waxy pure white flowers which are intensely fragrant. One of the best of the whole family. Sun or partial shade, good soil, moisture. Scarce. \$1.00 and \$2.50.

JASMINUM gracillimum (Borneo) "Pinwheel Jasmine"

Evergreen climber. Pure white flowers, fragrant. A very fine Jasmine. 60c and \$1.50.

JASMINUM grandiflorum (India) "Spanish Jessamine"

Tall, slender-arching stems as a shrub, or may be used as a semi-climber with a support. Has fragrant white flowers summer into winter; stands considerable heat and some drought. 50c and \$1.50.

JASMINUM liqustrifolium (India) "Indian Jasmine"

Compact bushy Jasmine with beautiful shining light green foliage and fragrant white flowers. Used as a shrub entirely. Sun or part shade. 60c and \$1.50.

JASMINUM revolutum (Tropical Asia) "Italian Jasmine"

An almost tree-like shrub to 15 feet, one of the hardiest Jasmines in cultivation. Has bright, golden-yellow flowers which are fragrant and appear in clusters. 50c and \$1.50.

KOELREUTERIA bipinnata (China) "Chinese Flame Tree"

Fast growing deciduous tree with dark green pinnate foliage, and a spreading habit. Covered in late fall with large bladder-like seed vessels of a vivid red color, almost as brilliant as the flowers of a Coral tree. Full sun, any soil, likes water and stands cold. 75c and \$1.75 to \$2.50 and up, according to size.

LEUCADENDRON argenteum (South Africa) "Silver Tree"

The famous tree from the Cape of Good Hope with the silvery foliage, considered one of the world's most beautiful trees. This tree will stand abundant water, but absolutely insists upon perfect drainage. Decomposed granite soils best. 5 gallons, \$3.50 to \$5.00.

LEPTOSPERMUM laevigatum (Australia) "Tea Tree"

Large spreading shrub, graceful arching branches and greyish-green foliage; needs very little water and thrives in almost any soil. Especially valuable near the beaches. 50c and \$1.50.

LEPTOSPERMUM nicholai (hybrid)

A medium growing variety with red or white flowers, bronzy leaves and a very satisfactory plant. 60c and \$1.50.

LEPTOSPERMUM scoparium roseum (New Zealand)

Large growing evergreen shrub, graceful arching branches, rosy pink single flowers. 60c and \$1.50 to \$2.50.

LEUCOPHYLLUM texanum (Texas and Mexico)

Evergreen shrub growing to a height of about seven feet, pretty small silvery-grey foliage, trumpet-shaped lavender-colored flowers in summer. Likes a fairly dry, sunny situation. A particularly good thing for a desert garden. Stands quite low temperatures. 60c and \$1.50.

LIBONIA floribunda (Brazil)

Dwarf evergreen shrub, small neat foliage covered in winter with masses of tubular yellow and scarlet flowers. Very pretty. Sun or shade, good soil, water. 50c and \$1.50.

LONICERA hildebrandt (Burma) "Giant Honeysuckle"

The largest growing of this family. Fine lustrous evergreen foliage, racemes of very large yellow and white flowers, very fragrant. We have measured individual flowers on our plants more than six inches long. A very beautiful thing as a cut flower. Uncommon. Strongly recommended. Sun or shade, good soil, likes water. \$1.00 and \$2.00 to \$3.00 and up.

LOTUS bertholeti (Canary Islands) "Pigeon's Beak"

Delicate trailing plant with silvery foliage and red flowers like its nickname. Valuable for rock work, window boxes, walls, etc. Sun or shade, light soil, careful with water. 2¼" pots, 15c; 3" pots, 25c.

LUCULIA gratissima (India) "Flower of Heaven"

Choice evergreen shrub, handsome foliage, large terminal corymbs of salver-shaped flowers of light rosy-pink, with intoxicating fragrance. Blooms in winter. One of the most beautiful plants in cultivation but not easy to grow. Partial shade, leafy acid soil, with good drainage. 75c and \$2.00.

MACKAYA bella (South Africa)

Strong growing evergreen shrub, long racemes of trumpet-shaped, beautifully-veined lavender flowers. Likes shade and good soil and water. Recommended. 60c and \$1.75.

MAGNOLIA grandiflora (Southern United States)

A noble evergreen tree, large white fragrant flowers to eight inches across. Stands considerable drought, but will make more rapid growth in heavy soil with lots of water. 50c and \$1.50 to \$2.50.

MAGNOLIA soulangeana purpurea

Large deciduous shrub or small, round-headed tree to 20 feet, having abundant large flowers in the spring before the leaves break; flowers purple. Like same conditions as *M. grandiflora*. Bushy plants, two to three feet, \$3.50. Larger plants, \$3.50 up.

MAHERNIA verticillata (The Honey-Bell)

Sub-shrub with branches to one foot high; yellow, very fragrant flowers in the winter and spring. Very good ground cover. Full sun. 4" pots, 25c; gallon, 40c.

MANDEVILLEA suaveolens (The Chili Jasmine)

Medium-height vine making rapid growth but scant covering; has large, single, pure-white fragrant flowers in the summer. 50c.

METROSIDEROS tomentosa (New Zealand)**"New Zealand Christmas Tree"**

Bushy evergreen tree, handsome greyish-green foliage, covered in summer with clusters of crimson flowers like Christmas ornaments. Will stand wind and cold and salt air, making it a valuable tree for the sea coast. Can also be trimmed as a hedge. Full sun, any soil, likes water but will stand drought. 75c and \$2.00.

MOREA bicolor (South Africa) "Natal Lily"

Iridaceous evergreen foliage. Same habit as the ordinary Moraea with the exception that the flowers are cream-yellow with dark center. Free blooming and attractive. Full sun, any soil, not much water. 75c and \$2.00.

MORAEA iridioides (South Africa) "Fortnight Lily"

Iridaceous evergreen plant, sword-shaped slender foliage to about three feet, the flowering spikes are about four to five feet high, large iris-like flowers with pure white petals, beautifully marked with violet and yellow. Very easy to grow. Blooms regularly about every two weeks throughout the year. Full sun, any soil, not much water. 60c and \$1.75.

MURRAYA exotica (Australia) "Exotic Orange"

Belonging to the orange family, very compact-growing evergreen shrub, making a beautiful shapely bush, small dark green compound foliage, pure white flowers resembling small orange blossoms in clusters, very fragrant, as compact as a box tree. Highly recommended. Full sun or one-half shade, any soil, water \$1.00 and \$2.50.

MYRTUS communis compacta (Myrtle)

Evergreen aromatic shrub to three feet, light-green waxy foliage studded with fuzzy-white flowers, and a very compact habit of growth. Good specimen plant as well as a good hedge plant under trying conditions of heat, drought or cold. 40c and \$1.50 to \$2.00.

NERIUM oleander (The Orient)

We grow several varieties in white, pink, salmon and a very fine large red. Full sun, any soil, water. 40c and \$1.50.

ODONTOSPERMUM sericium (Canary Islands)

A low-growing shrub with silvery grey-green foliage and masses of daisy-like golden flowers, nearly any time of the year. New and very scarce. Full sun, light soil, not much water. 4" pots, 35c; gallon, 60c.

OCHNA multiflora (South Africa)

Dwarf evergreen shrub, new foliage of a beautiful bronzy color, deep golden yellow flowers in spring, succeeded by the seed vessels which have vivid red capsules with black seeds. This is a very beautiful thing either in flower or fruit. Seems to prefer half-shade. New introduction. \$1.00 and \$2.00 to \$15.00.

OXERA pulchella (New Caledonia) "Royal Climber"

Here is a vine that is "different." Dark evergreen foliage, large clusters of pure waxy white tubular flowers in long drooping panicles. As its name implies, this is truly an aristocrat among climbers and we regard it as one of the choicest new vines that we grow. Sun or partial shade, good soil, moisture. Very rare. \$1.50 and \$3.00 to \$5.00.

PARKINSONIA aculeata (Texas and Mexico)

Tropical tree to 30 feet, with spines about one inch long with curious flattened twig-like stalks, yellow fragrant flowers. A flattened tree for the sunny garden where a tree effect is wanted without a degree of shade. 50c and \$1.50 to \$2.00.

PASSIFLORA princeps (South America)**"Red Passion Flower"**

In our opinion the gem of all the family. Leathery foliage, very infrequently attacked by insects, long racemes of vivid scarlet flowers on long wiry stems. Very beautiful. Should be planted over a pergola so that the long flower clusters hang down through the roof. Good soil and moisture. \$1.00 and \$2.00 to \$3.00.

PELARGONIUM coccineum (South Africa)

Very dark green leaves, spikes of small vivid scarlet flowers in good-sized clusters, makes large spreading clumps. A very choice and beautiful plant for a garden. Rare. 4" pots, 35c; gallon, 50c.

PELARGONIUM crispum (South Africa)

Small, neat, compact bush, small dark green very fragrant foliage, heads of single purple flowers. Sun or half-shade. 4" pots, 35c; gallon, 50c.

PELARGONIUM echinatum (South Africa)
"Sweetheart Geranium"

One of the parents of most of our Pelargonium hybrids. Semi-tuberous root, somewhat thorny stems, greyish foliage, grows to about 18 inches. Covered with very pretty white flowers that change to pink, with two perfect hearts of dark red in the upper petal. Full sun, any soil, not much water. 4" pots, 35c; gallon, 50c.

PELARGONIUM HYBRIDS

"MARTHA WASHINGTON GERANIUMS"

EVANS & REEVES NURSERIES carry one of the finest collections of the state of these showy perennials and you will be amazed and delighted with the variety of gorgeous new colors. Many of them resemble Azeleas in all their beauty and a planting of them will brighten up your garden with a riot of color. All varieties, except where noted, 3" pots, 25c; 4" pots, 35c; 6" pots, 75c.

Easter Greeting. Red with dark eyes.

Lucy Becker. Pink with dark eyes.

Schwabian Maid. Dark salmon with dark eyes.

Wurtenbergia. Deep red with dark eyes.

German Glory. Catleya blue, two dark eyes.

Mrs. Sanders. Very large flower, white with dark eyes.

Gardener's Joy. Salmon with dark eyes. 50c.

Orchid. Orchid lavender with dark eyes.

Sensation. Deep red.

Andenken an Moskow. Dark lavender.

Mrs. Loyal. Pansy Geranium, lavender dark eyes.

Bertha Wagner. Rose pink, dark eyes.

Olympic. Pure white

Miss Edith Cavell. White with dark eyes.

Anita. Light pink-white center, two dark red eyes.

Edith North. Rose pink, dark pink eye, novelty. 50c.

Santa Monica. La France pink, crimson spots merging to rose. 50c.

Glendale. Salmon-cerise, with deep red spots on upper petals, scarlet markings on lower. 50c.

Springtime. Bright pink ruffled border, white edge and center. 50c.

Orchid Frill. Lavender with dark eyes, frilled edge.

Pride of Quedlinburg. Shades from light to very dark salmon-pink.

Prince Bismark. Rich lavender with black eyes.

Wolfgang Goethe. Red with dark eyes.

The Princess. Lavender, novelty.

Beautiful. Pink with dark eyes.

Lavender Queen. Lavender with light eyes.

Bismark. Rich lavender with black blotches.

Chicago Market. Delicate rich rose pink, two bright red blotches.

Faiss Triumph. Light salmon, white throat, blotched upper petals, black and red.

Spring Magic Frulingszauber. White, light tinge pink, red blotches on upper petals.

Garfield Park. Deep pink, dark blotches, sport of Easter greeting.

Graf Zeppelin. Salmon, blotched with reddish-brown on upper petals.

Grossmama (Fischer). Clear dark salmon, two dark blotches.

Karminkonigen. Carmine red, two small blotches.

Marie Vogel. Red slightly shaded to salmon, two dark blotches.

Neuheite Faiss. Lavender, deep purple blotches.

Quercifolium. Scarlet flowering, rose geranium with large dark green foliage.

Beverly Hills. Beautifully ruffled orchid-pink, crimson markings in upper petals. 50c.

Mary Bard. Snowy white, with slight blush at center. 50c.

Ruth McAfee. Beautiful coral-rose with crimson eyes. 50c.

Diener's Giant. Very large flowers, lower petals lustrous rose, upper petals deeper rose with crimson markings. 50c.

Venus. A soft clear pink, upper petals deeper color, with maroon eyes. 50c.

TWO NEW NOVELTY GERANIUMS

Stars and Stripes. Lovely little double flowers striped red and white. Very unique and scarce. 3" pots, 25c; 4" pots, 35c; gallon, 50c.

Crimson Whirl "Poinsettia Geranium". Beautifully whorled little flowers of crimson, like a miniature poinsettia. Also quite scarce. Same price as above.

PENSTEMON cordifolius (California)

Shrubby climbing Pentstemon, often covering a considerable area, the ends of the young branches bearing large clusters of red blooms. Very pretty and attractive shrub in the garden, does particularly well rambling in bushes and trees. 60c.

PENTAS carnea (South Africa) "Star Clusters"

Small shrub, large heads of beautiful lavender pink flowers resembling a Bouvardia. A very choice and desirable small shrub. Will not stand too much cold. Highly recommended. Excellent pot plant. Sun or partial shade, good soil, moisture. 4" pots, 50c; gallon, 75c.

PHASEOLUS caracalla (South America) "Snail Vine"

Unusual and attractive vine. By no means new, but hardly ever encountered. Very fragrant blue and white flowers, shaped like a snail, in good-sized clusters. Invariably admired. Full sun, any soil. 60c and \$1.75.

PHILADELPHUS sempervirens (China)

Evergreen climber, very long racemes of intensely fragrant cream-colored flowers on long stems, a profuse bloomer and a good winter bloomer. In this climate much the best of all the family. 50c and \$1.50.

PITHECOCTENIUM muricatum (Mexico)

Strong-growing vine related to the Bignonias, racemes of cream-colored flowers with yellow throat, very showy on a fence. Full sun, any soil, water. 50c.

PITTOSPORUMS

Too well known to need description here. Valuable for specimens and for hedges. All varieties. Gallon, 40c; 5 gallons, \$1.50 to \$2.00.

PLEROMA grandiflora (South America) "Princess Flower"

Very choice evergreen shrub, beautifully-veined velvety foliage, umbels of large salver-shaped royal purple flowers of regal beauty. A beautiful and aristocratic plant that excites the admiration of everyone, whenever seen. Partial shade, acid, peaty soil and moisture. 60c and \$1.75.

PLEROMA scandens (Brazil) "Weeping Princess Flower"

A scandent type of the above variety with smaller deeper blue-violet flowers. Fine to espalier against a wall or on trellis. 60c and \$1.75.

POLYGALA apopetala (Lower California) "Purple Broom"

Tall, slender evergreen shrub with a profusion of pea-shaped purple flowers resembling the "brooms." Flowers over a long period and one of the best garden shrubs that we grow. Highly recommended. Full sun, any soil, moisture not important. 60c and \$1.50 to \$2.00.

POLYGONUM auberti (Bokhara) "Climbing Knot Weed"

Vigorous deciduous climber, flowering all summer with long trailing racemes of white flowers with a blush tinge. A beautiful thing for cut flower work. Perfectly hardy in any situation. 50c and \$1.50.

PYRACANTHAS "Fire Thorns"

Well-known evergreen shrubs with the brilliant berries of red or orange. Full sun, any soil, moisture not important. All varieties: 40c and \$1.50 to \$2.00.

Crenulata. Medium size shrub, bright red berries.

Formosiana. Tall shrub, large bright red berries in winter.

Lalandi. Tall shrub, brilliant orange berries in summer and fall.

Yunnanensis. Prostrate shrub, orange or coral berries.

RAPHEOLEPSIS indica (India) "Indian Hawthorne"

Low evergreen shrub; the new growth often red, giving it a pleasing appearance. White clusters of flowers in the early spring, followed by black, round, shiny berries. A permanent and very satisfactory plant. Sun, any soil, water. 60c and \$1.50 to \$2.00.

REINWARDTIA trigynum (India) "Golden Flax"

A dwarf evergreen shrub, large trumpet-shaped deep yellow flowers along the branches. Does well in either sun or shade. Very fine window bloomer. 40c and \$1.50.

REINWARDTIA tetragynum (India)

Low-growing and spreading shrub with a profusion of flowers of the most wonderful shade of clear lemon-yellow. Like the above, it blooms in winter and if you like yellow flowers you will love this. Very scarce. Sun or shade, any soil. 75c and \$1.75.

ROMNEYA coulteri (California) "Matilija Poppy"

Large semi-woody perennial, light bluish-green foliage, huge poppy flowers resembling rice paper with yellow tassel in center. Should be planted in a situation where it will not interfere with other plants and then left alone. Full sun, any soil, not much water. Ideal for dry banks. 75c and \$2.00.

RONDELETIA cordata (South America)

Strong-growing, bushy, evergreen shrub to about 12 feet, handsome foliage. The plant comes into bloom in late winter and early spring, when it is very lovely, with large clusters of small flesh-pink flowers with yellow throats. One of the most desirable and beautiful shrubs we grow. Prefers plenty of water. Will do equally well in sun and shade. Very highly recommended. \$1.00 and \$2.00 to \$3.00.

ROSES. All the best varieties at any time of the year. Reasonably priced.

ROSA gigantea (Western China) "Giant Rose"

A tremendous grower, will cover a large space in a short time. In spring a mass of large creamy-yellow single flowers in good-sized sprays. No more fragrant rose in existence; it scents the air for quite a distance around. A very beautiful sight when it is in full bloom. Rare. \$1.00 and \$2.00 to \$3.00.

RUELLIA macrantha (Brazil)

Can be grown either as a shrub or herbaceous perennial. Spikes of deep pink trumpet-shaped flowers with a touch of magenta, in good-sized panicles at the end of the young growth. The plant grows to about six feet in height. A good winter bloomer. Uncommon. Partial shade, good soil, water. 50c and \$1.50.

BYNCHOSPERMUM jasminoides (East Indies) "Star Jasmine"

Handsome small dark green foliage, panicles of very fragrant creamy-white flowers. One of the most satisfactory evergreen vines of medium height. Can also be used as a ground cover. Sun or shade, good soil, moisture. 60c and \$1.75 to \$2.50.

BYNCHOSPERMUM divaricatum (Malay Peninsula)

A very rare variety of the above, with flowers of creamy-yellow. Very scarce. \$1.00.

SENECIO confusus (Mexico) "Climbing Cineraria"

A very showy plant that can be used as a shrub, climber or as a ground cover. Shiny dark green foliage, and a profusion of flowers like small Cinerarias, color is pure glowing orange with golden centers. We consider this one of the best novelties we have had for some time and you will certainly agree with us when you see this in bloom, which, incidentally, lasts from spring until late fall. Quite new. Full sun, good soil and moisture. 60c and \$1.75.

SCHIZOCENTRON elegans (Mexico)

The aristocrat of all ground cover plants for shady places! Makes a dense mat on the ground and is covered in spring and summer with hundreds of rosy-mauve flowers like a small Pleroma. Likes a loose, peaty soil with moisture and will rapidly cover a large space. Very highly recommended. 3" pots, 35c each.

SOLANDRA guttata (South America) "Cup of Gold"

Strong rampant growing vine, with huge trumpet-shaped flowers of gold, purple stripings in throat. One of the most spectacular of all flowering vines. Full sun, any soil, not much water when well established. 50c and \$1.50 to \$2.00.

SOLANDRO longiflora (Mexico) "Cup of Milk"

Similar to the above, with smaller foliage and longer, smaller flowers of white with frilled edges. Flowers fade to gold with age. 75c and \$2.00.

SOLANUM rantonetti (Argentina)

Shrubby climber to six or eight feet, having good foliage and good quantities of purplish-blue flowers almost continuously throughout the year. A plant of great merit. 40c and \$1.50.

SOLANUM seaforthianum (Brazil)

A lovely small shrubby climber, with great clusters of star-shaped one-inch flowers of a soft light azure-blue color, followed by red berries. Sun or shade, any soil, moisture. 60c and \$1.50 to \$2.00.

SOLANUM wendlandi (Costa Rica) "Giant Potato Creeper"

A shrubby climber, deciduous, with great trusses of pale blue flowers in the summer, wants full sun, is a gross feeder and should be heavily pruned to induce new foliage and flowers, tender. A real aristocrat for the garden. 75c and \$2.00.

SOPHORA davidii (China)

Deciduous shrub, small pinnate foliage, a sheet of blue pea-shaped flowers in early spring. Should be more planted than it is. Very beautiful when in full bloom. Uncommon. 75c.

STERCULIA acerifolia (Australia) "Flame of the Forest"

Tall slender-growing evergreen tree with fine lustrous, dark green, deeply-cut leaves, racemes of scarlet flowers. 5 gallons, \$1.50 to \$2.00.

STERCULIA bidwilli (Australia) "Flame Tree"

Similar to the above with finer-cut leaves, flowers in great crimson trusses. 5 gallons, \$2.00 up.

STEPHANOTIS floribunda (Madagascar)

Twining evergreen vine, handsome leathery dark green leaves, clusters of waxy pure white intensely fragrant flowers. Does quite well in a protected place and should be more planted than it is in situations free from hard frost. Blooms are extensively used in the east and Europe for cut flower work. 4" pots, 75c; 5" pots, \$1.50.

STIGMAPHYLLON ciliatum (South America) "Orchid Vine"

Climbing vine, slender growth, very pretty foliage, sprays of bright yellow flowers of large size, very much resembling the Orchid *Oncidium*. A very beautiful and choice thing and a profuse bloomer. Uncommon. Highly recommended. Full sun, good soil, water. 75c and \$1.75 to \$2.50.

STRELITZIA reginae (South Africa) "Bird of Paradise"

The famous tropical plant with the exotic flowers resembling the plumed head of the bird of paradise.

EVANS & REEVES NURSERIES are one of the largest growers of these beautiful plants and we have them in all sizes from small plants up to ten-year-old specimens. Sun or shade, good soil, fertilizer and water. 4" pots, 75c; gallon (2 years old), \$1.50; gallon (3 years old), \$2.50; flowering size, \$3.50 up.

STROPHANTHUS speciosa (South Africa)

Low-growing evergreen shrub with dark green, fine foliage, terminal cymes of very curiously-formed flowers with long twisted sepals of red and cream. One of our best shrubs for landscape work, as it keeps its fine appearance every day of the year. Will be scarce for some time. 60c and \$1.75 to \$2.50.

SUTERA grandiflora (South Africa) "Transvaal Phlox"

A new introduction that has made a great hit with garden lovers. This perennial grows to about two feet, has sage-like foliage and is covered most of the year with phlox-like flowers of a beautiful blue-lavender. Wonderful for banks and borders. Full sun, any soil, not much water. 3" pots, 25c; gallon, 60c.

TECOMA australis rosea (Australia)

Vigorous evergreen vine, handsome green pinnate foliage similar to the common *Tecoma australis*, with the exception that the flowers instead of being white or cream color are rosy-pink in large drooping racemes. Sun or shade, any soil, water. 50c and \$1.50 to \$2.00.

TECOMA jasminoides (Australia)

Evergreen climber, pretty lustrous evergreen foliage, clusters of trumpet-shaped flowers, white, with pink or purple throat. Sun, good soil, water. 50c and \$1.50 to \$2.00.

TECOMA jasminoides alba

Similar to the above with flowers of pure white. Very scarce. 75c and \$2.00.

TECOMA garrocha (Argentina)

A medium-sized very graceful shrub to five feet with supple willowy branches, large clusters of narrow yellow and scarlet trumpets, really a handsome shrub and very desirable when used for mass effects. Full sun, any soil, moisture. 60c and \$1.50.

TECOMA grandiflora (China) "Giant Trumpet Vine"

One of the finest of all the trumpet vines with great clusters of large brilliant orange blossoms in spring and early summer. Hardy anywhere. Deciduous in winter. 60c and \$1.75.

TECOMA smithii (hybrid)

Medium-sized shrub, with light green foliage and terminal heads of orange flowers from mid-winter into spring. Does best when planted in a protected place. 60c and \$1.50.

TECOMA stans (South America) "Yellow Elder"

A very handsome summer flowering shrub, large clusters of bright yellow trumpet-shaped flowers, worth a place in any garden. Will stand a good deal of cold. Strongly recommended. 50c and \$1.50.

TECOMA velutina (Guatemala)

More compact in habit and literally covered with flowers all summer and fall. One of the finest of all the golden-flowered shrubs. Full sun, any soil, water. 75c and \$1.75.

TITHONIA arborea (Mexico) "Tree Sunflower"

A giant sunflower with canes sometimes 15 feet high, clusters of huge golden flowers. In the proper place this is one of the most striking plants imaginable. Should be cut back after blooming. 60c and \$1.75.

THEVETIA nerifolia (Mexico) "Yellow Oleander"

Medium-size evergreen shrub, pretty shining foliage, yellow trumpet-shaped flowers in summer. Uncommon. Full sun, any soil, moisture. 50c and \$1.50 to \$2.00.

THUMBERGIA gibsoni (South Africa) "Orange Glory"

Evergreen twining vine, or can be used as a ground cover. Small foliage and a profusion of trumpet-shaped flowers of a most vivid orange. A very showy and useful plant for fences, trellis, walls or banks. Very highly recommended. 4" pots, 35c; gallon, 60c.

THUNBERGIA grandiflora (India) "Blue Trumpet Vine"

In mild locations a magnificent vine. Of rapid growth, with large heart-shaped leaves, the individual three-inch blossoms hanging in clusters over the plant, and a color that is bright sky-blue. Blooms in fall, winter or spring. Semi-shade, good soil and moisture. 75c and \$2.00.

TIPUANA speciosa (South America) "Tipu Tree"

Large deciduous tree of rapid growth, spreading habit. Smothered with drooping yellow blossoms in the summer. Always attracts attention when in bloom. Stock scarce. Full sun, good soil and moisture. 75c and \$1.75.

TRACHELIUM coeruleum (Southern Europe) "Throatwort"

Grows to two feet, with handsome dark green foliage, and in late summer produces spreading panicles of bright blue flowers which keep for days after cutting. Sun or shade. 4" pots, 35c.

TRICUSPIDARIA dependens (Chile)

"Lily of the Valley Tree"

A splendid evergreen tree with the appearance and characteristics of the oak, but with the added qualities of myriads of flowers resembling Lily of the Valley, followed by ornamental seed pods of brick color. Makes a fine lawn specimen as it likes water. Strongly recommended. 60c and \$1.75.

TURRAEA obtusifolia (South Africa) "Star Bush"

Medium-sized compact-growing evergreen shrub, very free blooming, covered most of summer with white starry Jasmine-like flowers. Stands clipping well and makes a very attractive hedge. Should be freely planted. Highly recommended. Full sun, good soil and water. 60c and \$1.75 to \$2.50.

VITEX macrophylla (China)

Deciduous shrub growing to a good size, handsome foliage, greyish underneath, large spikes of blue flowers in summer. A very striking and showy plant when in full bloom. Has a symmetrical and handsome habit, worth a place in any garden. Quite uncommon. Full sun, good soil and moisture. 60c and \$1.50 to \$2.00.

VITEX lucens (New Zealand)

A handsome evergreen tree to 50 feet, with beautiful dark green compound foliage and many interesting pink flowers, followed by ornamental seeds. Very rare. The specimen in our display gardens is always much admired. \$1.50.

WESTRINGIA rosmarinifolia (Australia)

"Victorian Rosemary"

Evergreen, medium-sized shrub, olive-green foliage resembling the Rosemary, branches and under-side of leaves silvery white, clusters of white flowers. Makes a good hedge. Uncommon. Full sun, good soil. 50c and \$1.50 to \$2.00.
